**Source Samples 9.92 g/t Gold, 20.78 g/t silver and 0.63 % Copper over 8.0 Metres at Las Minas Project**

May 10, 2011 – Source Exploration Corp. ("Source" or the "Company") (TSX-V: SOP) is pleased to announce preliminary assay results for its sampling program at the historical Changaro mine located at the Company's Las Minas project, Veracruz, State, Mexico. The rock chip sampling included both surface and underground samples at the Changaro adit as well as samples in the area of historical mining. A plan map showing the various sample locations can be viewed on the Company's website at [www.sourceexploration.com](http://www.sourceexploration.com) – see Project – Maps. Highlights of the sampling program include:

- 8 metres grading 9.92 g/t gold, 20.78 g/t silver and 0.63 % copper or 11.45 g/ ton gold equivalent\*, including 2.0 metres grading 28.87 g/t gold, 20.3 g/t silver and 0.68% copper ( 30.46 g/t gold equivalent).
- 10 metres grading 3.03 g/t gold, 12.9 g/t silver and 0.61% copper or 4.35 g/t gold equivalent, including 4.0 metres grading 7.47 g/t gold, 29.35 g/t silver and 0.71% copper or 9.26 g/t gold equivalent.
- 16.0 metres grading 1.83 g/t gold, 13.01 g/t silver and 0.25% copper or 2.51 g/t gold equivalent

Brian E. Robertson, President and CEO, commented, "We are very encouraged by these recent sampling results. Historical mining at Changaro, one of the primary targets on the Property, was very selective and focused on very high grade ore. These sampling results clearly demonstrate that mineralization with significant grade and widths extend into the hanging wall and footwall of the historical stoping areas.

Results of the sampling program are shown in Table 1.

**Table 1 Sampling Results Changaro**

Sample No	Location	Width (M)	Au g/t	Ag g/t	Cu %	Gold Equivalent (1)
3469	Changaro Adit	2.0	0.60	1.9	0.14	0.90

(\*) Gold equivalents calculations use metal prices of US\$ 1300/oz. for gold, US\$ 25.00/ oz. for silver and US\$3.50/lb. for copper. No adjustments have been made for potential relative differences in metal recoveries.

Au EQ g/t equals  $Au\ g/t + (Ag\ g/t \times 0.019) + (Cu\% \times 1.77)$

Sonny Bernales, P.Geo., Project Manager, is the Qualified Person for the technical information contained in this press release and is a qualified Person within the meaning of National Instrument 43-101. Samples were shipped to SGS Mineral Services (ISO/IEC 17025) at Durango, Mexico for assaying. In addition to the laboratory's quality control program, a rigorous on-site quality assurance and control quality control program was implemented involving the insertion of certified standard reference materials including blanks.

### **About Source Exploration**

Source Exploration is a well-financed Canadian based mineral exploration company focused on the evaluation, acquisition and development of economic gold and silver deposits in Mexico.
